

## OME's CORTECH DRILL RIGS

- Small Foot Print
- Track-mounted, allowing easy manoeuvre
- Depth to 1000m, NQ, 700m HQ, 400m PQ
- Versatile and Compact
- Minimal Set-Up Time

Having a wide range of rigs, from small limited-access tracked rigs to large truck-mounted rigs, allows us to supply exactly what is needed for the requirements of individual sites.

With the new, smaller Cortech rigs, OME has been able to undertake projects which previously would have been extremely difficult for its larger machinery, and our clients have therefore gained access to areas which previously had been a challenge to reach.

Our rigs are easily transportable, fitting easily into a standard sea container with plenty of room for support equipment. They move between holes quickly and efficiently with minimal set-up time.

Capabilities are 1000m NQ, 700m HQ and 400m PQ.
